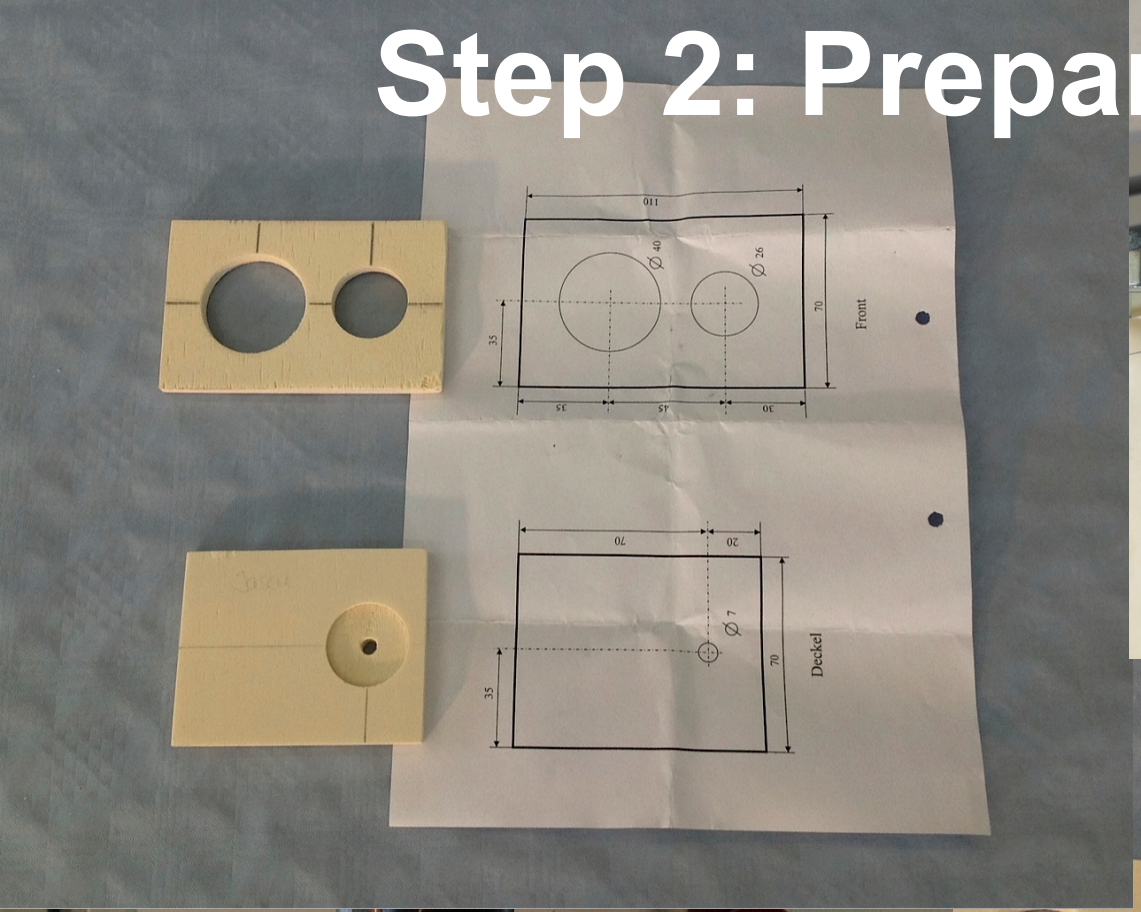
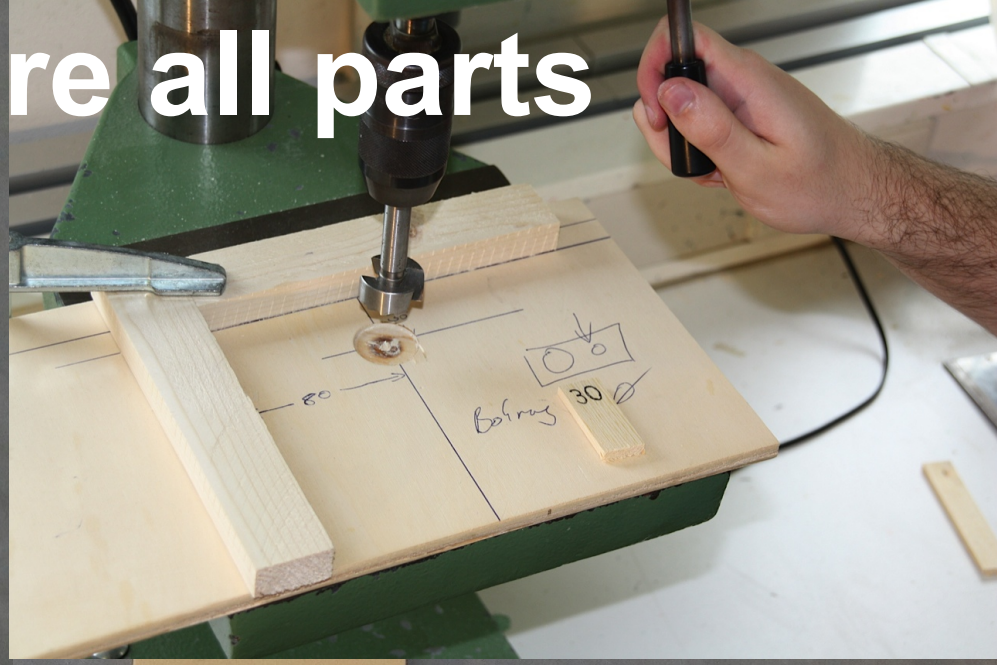
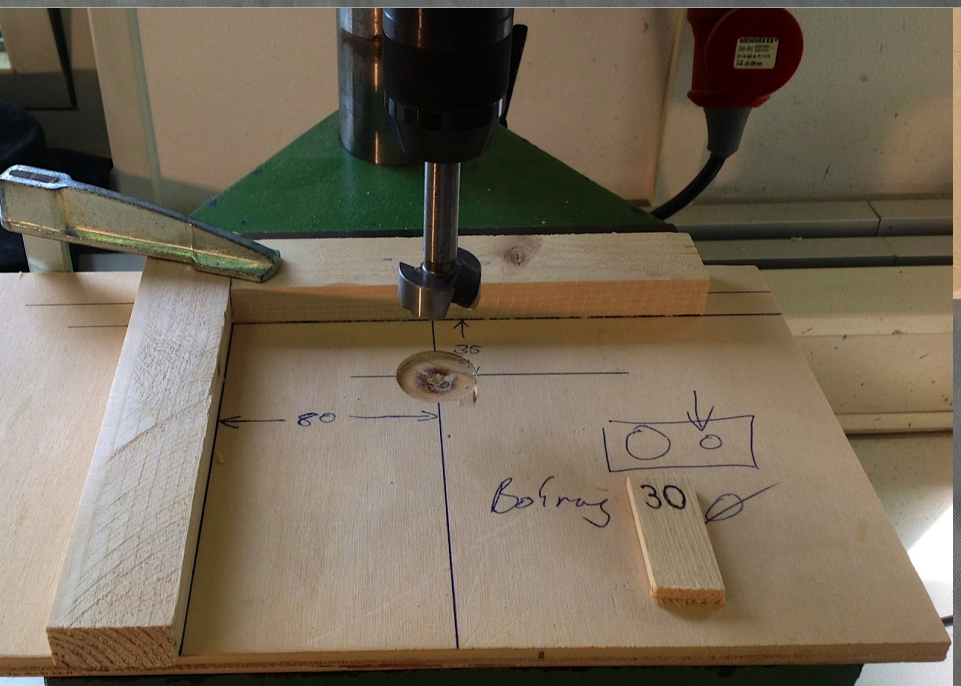
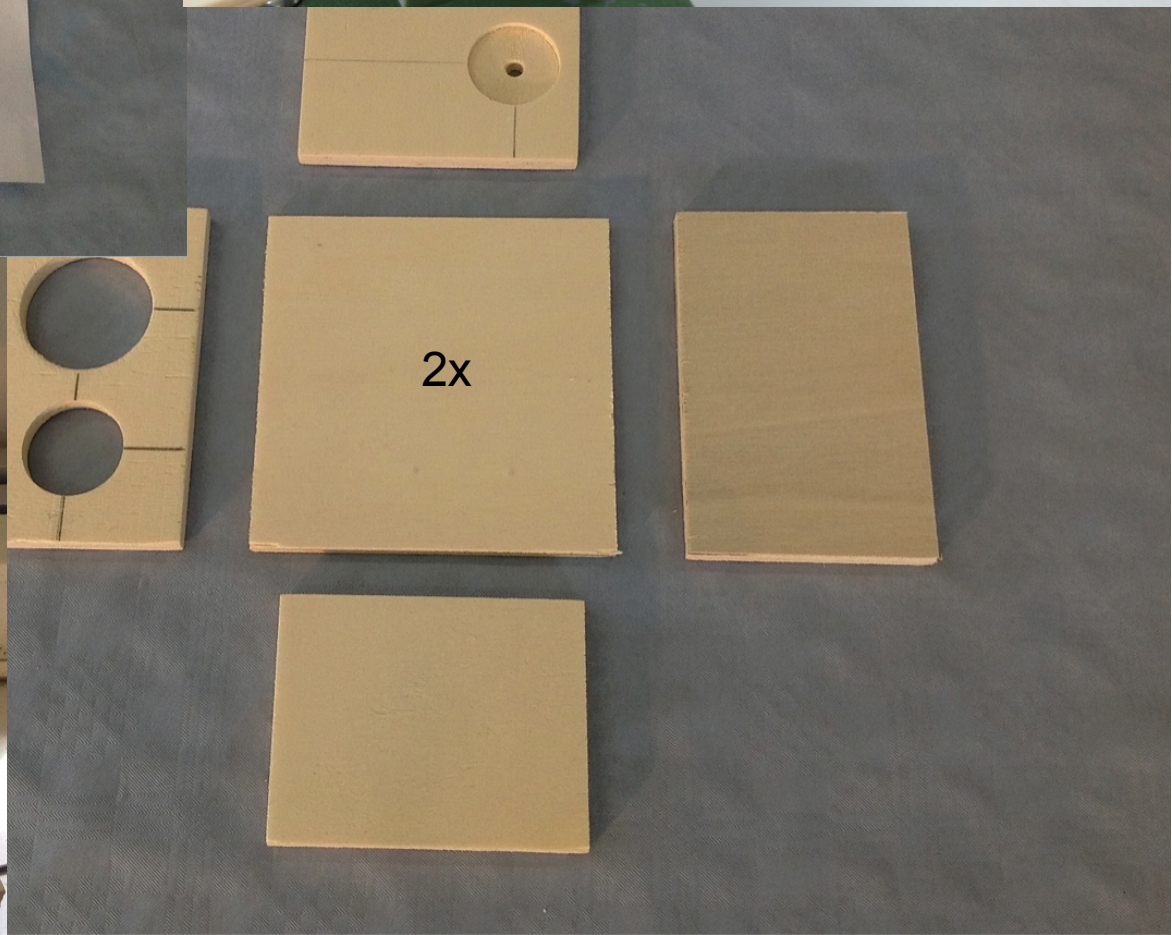
Step 1: Check if you have all parts you need

Step 2: Prepare all parts

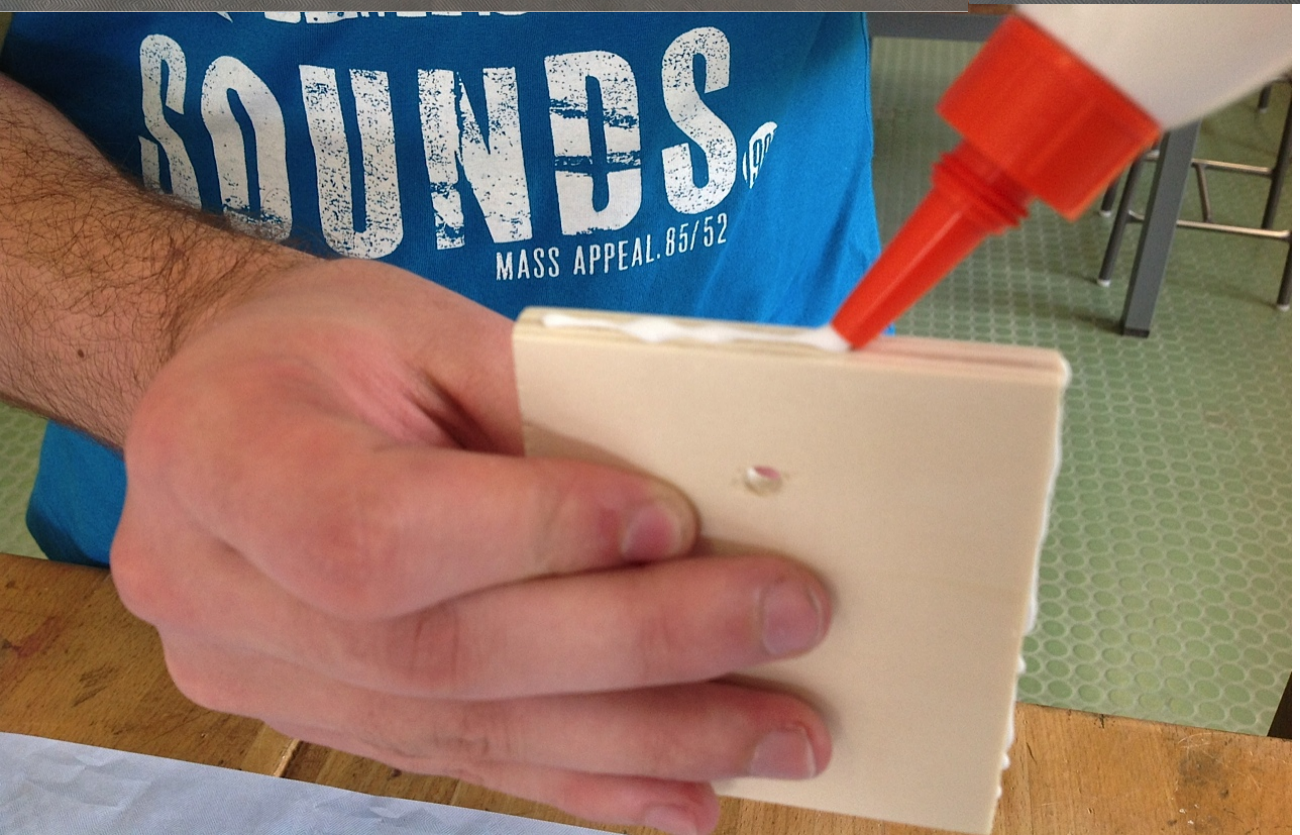




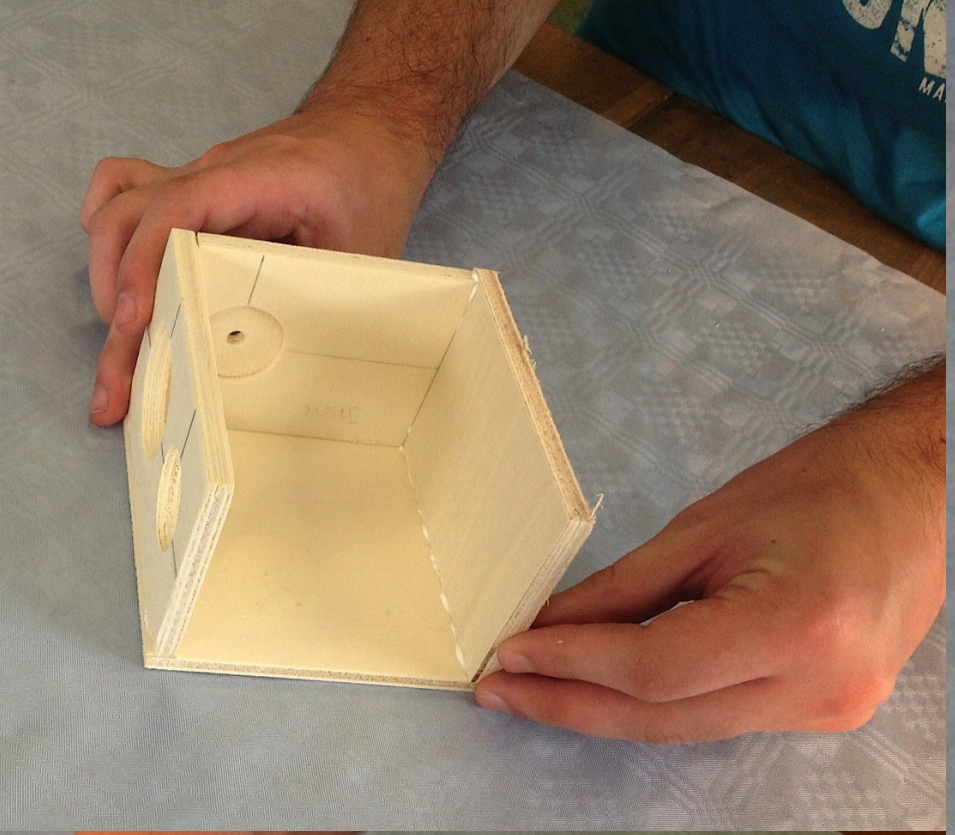


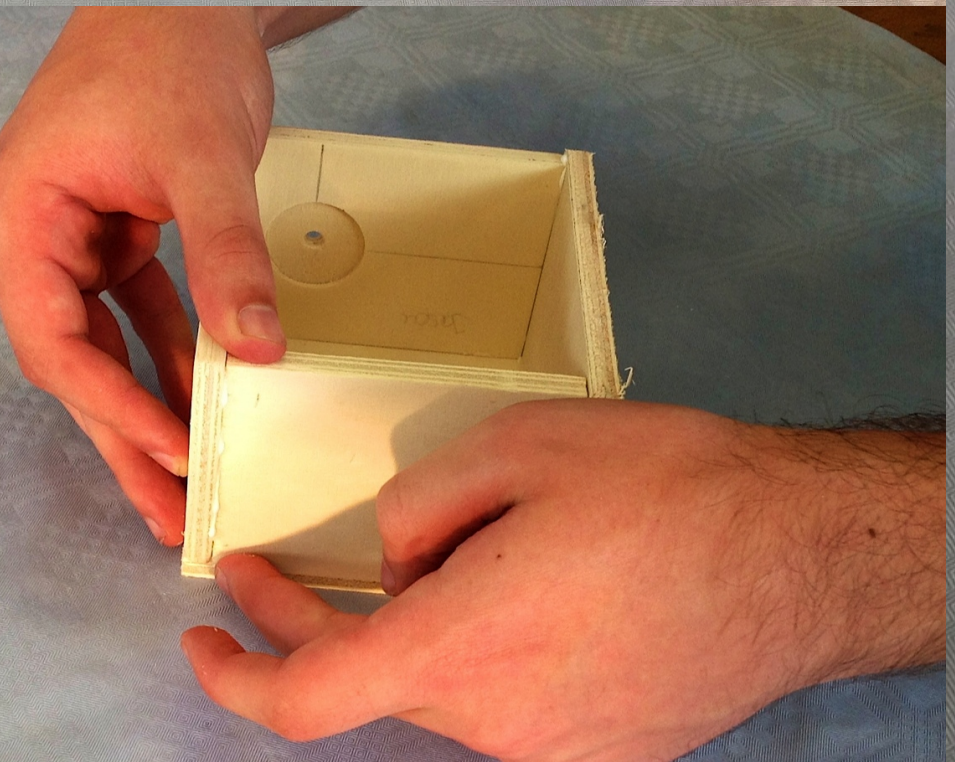


Step 3.1: Glue all wooden parts together

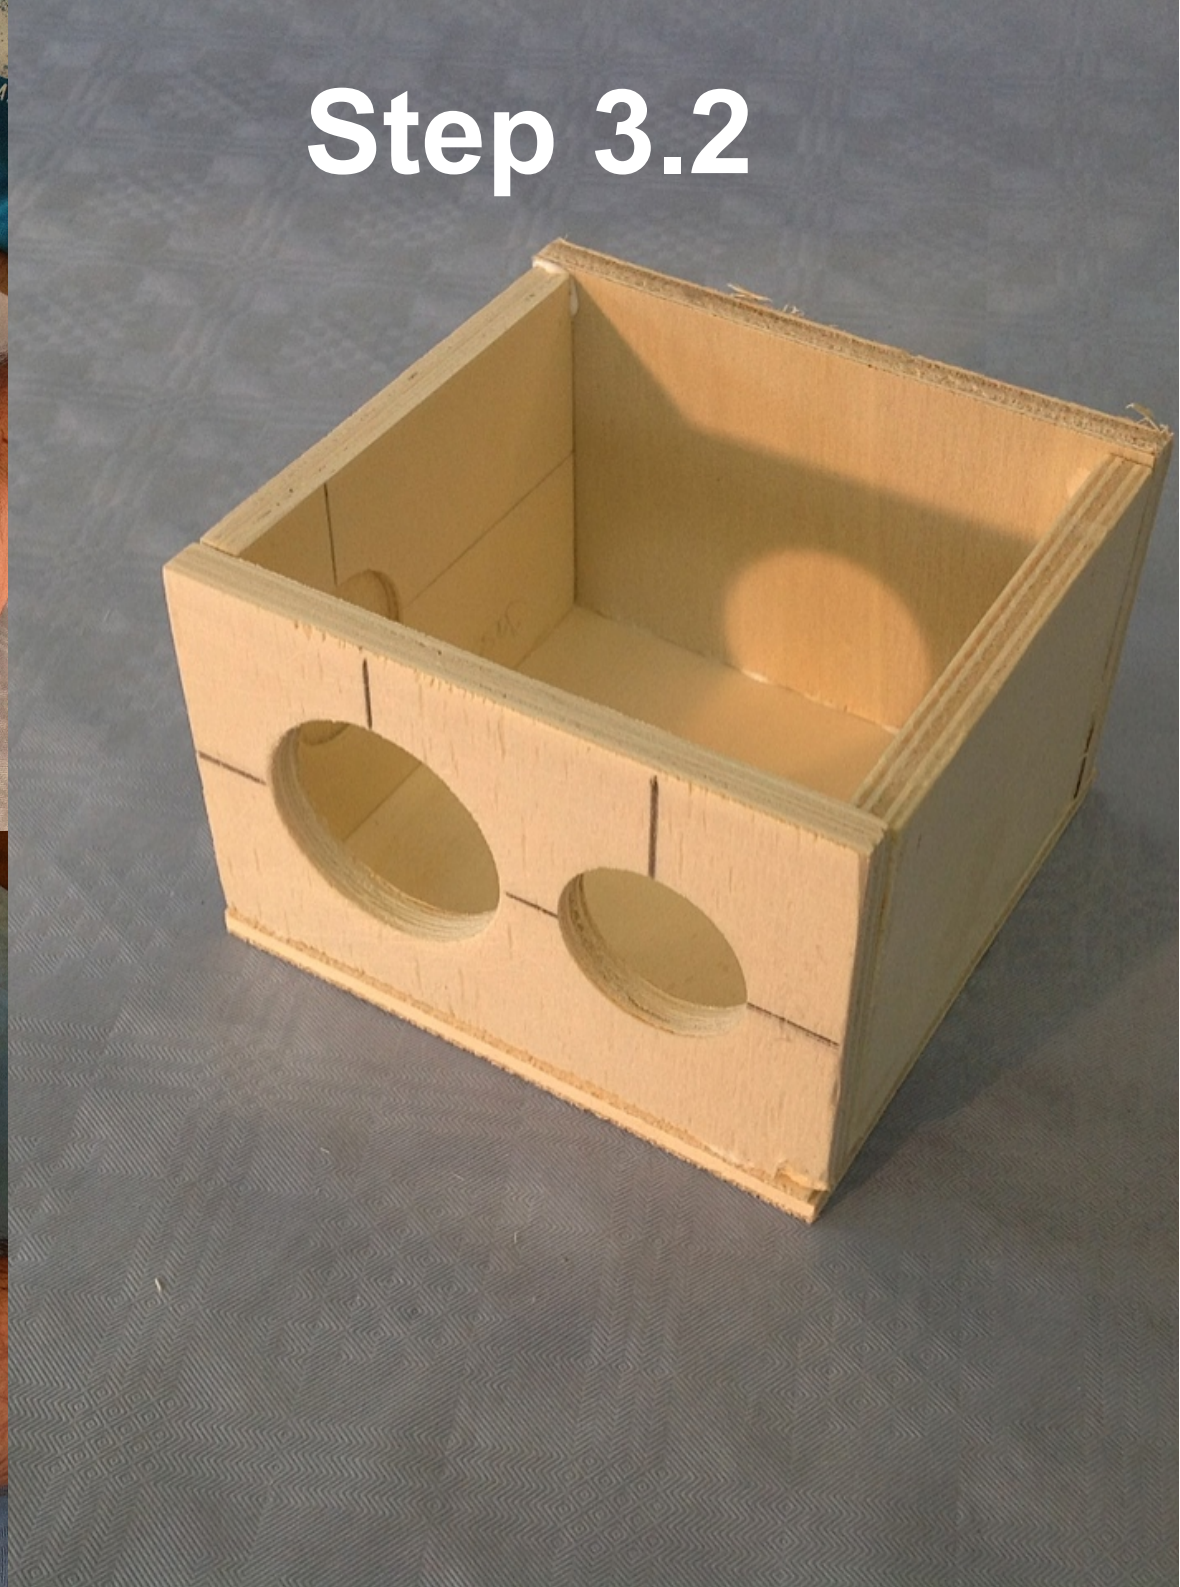


Tip: Make sure to glue every edge that touches another edge

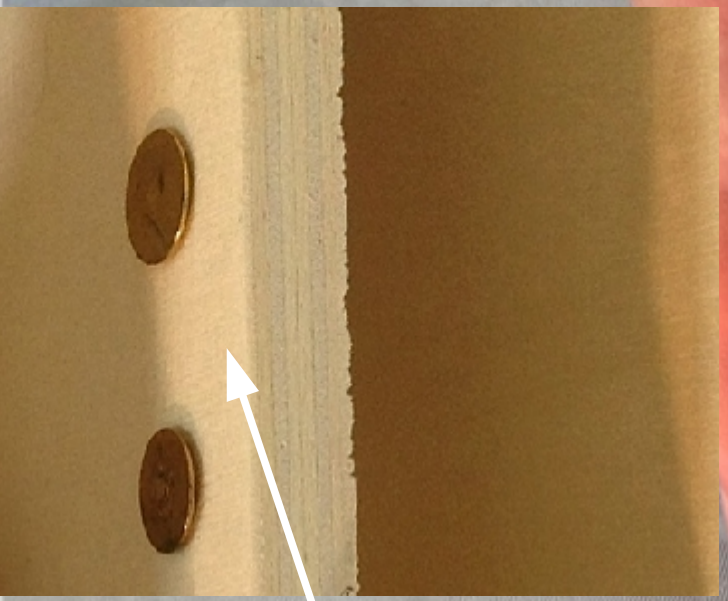




Step 3.2



Step 4: Place the spacer inside of the box

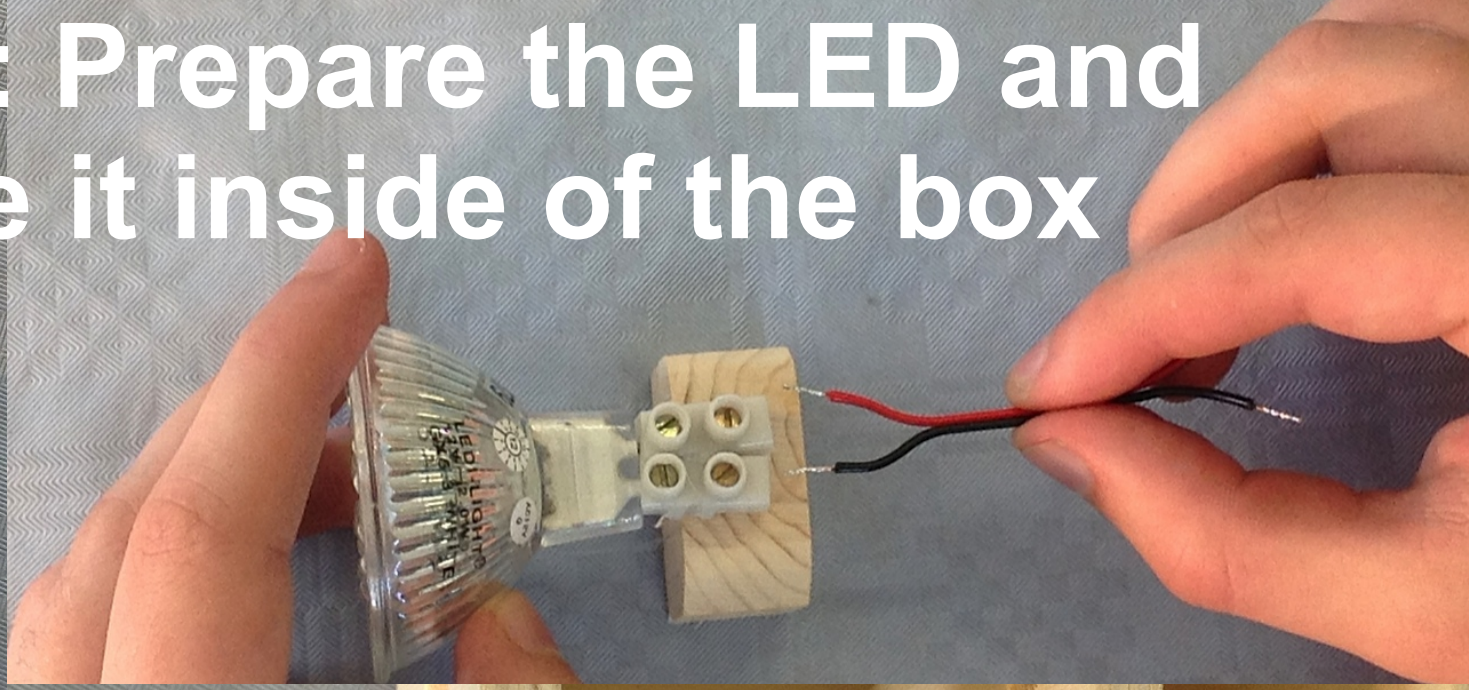


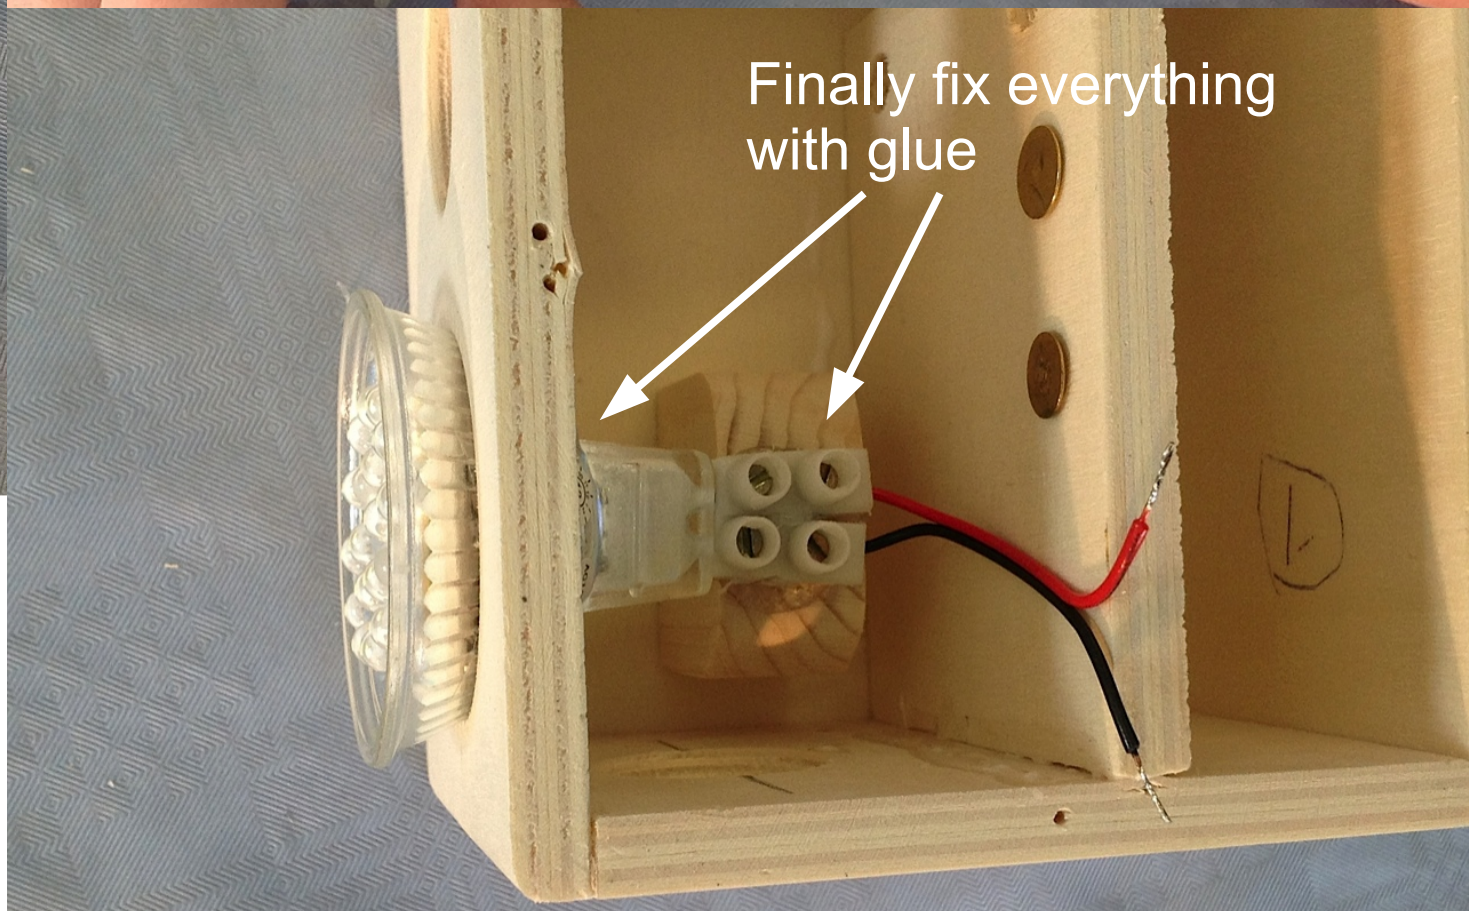
Place 2 tacks to the spacer. You will need them later

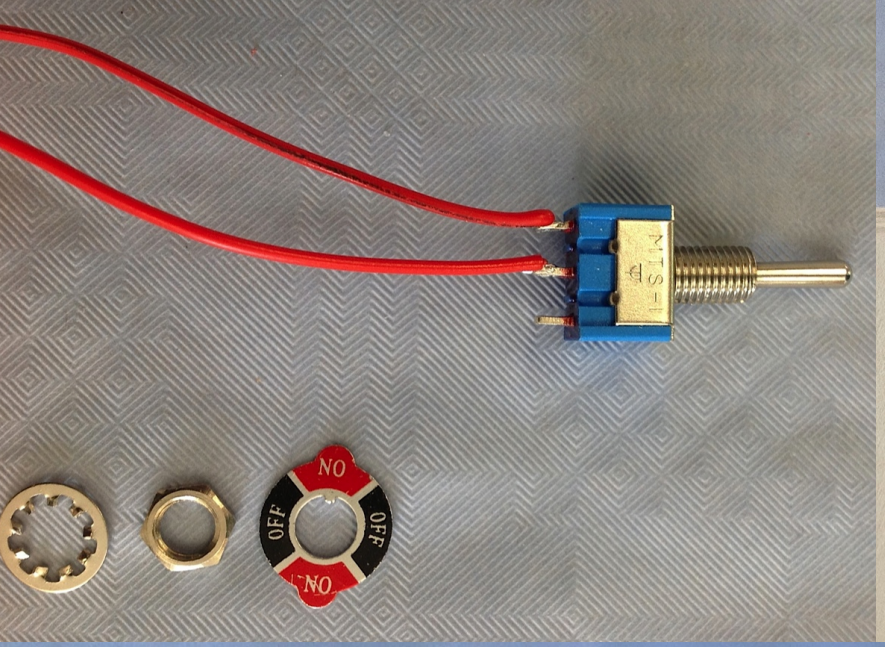
Tip: Use the battery box to get the exact position of the spacer

Step 5: Prepare the LED and place it inside of the box

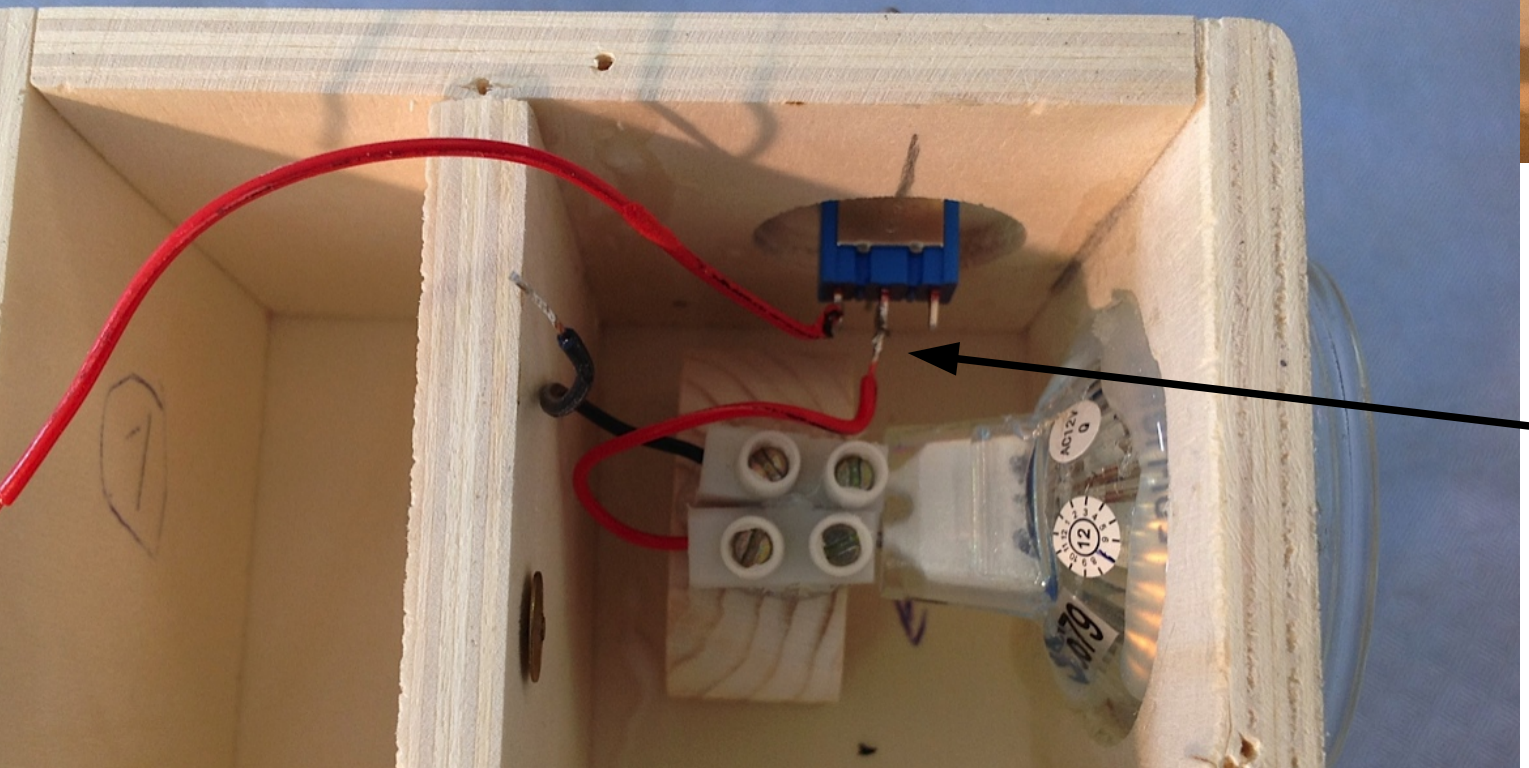
Cut out the coupler to get the luster smaller



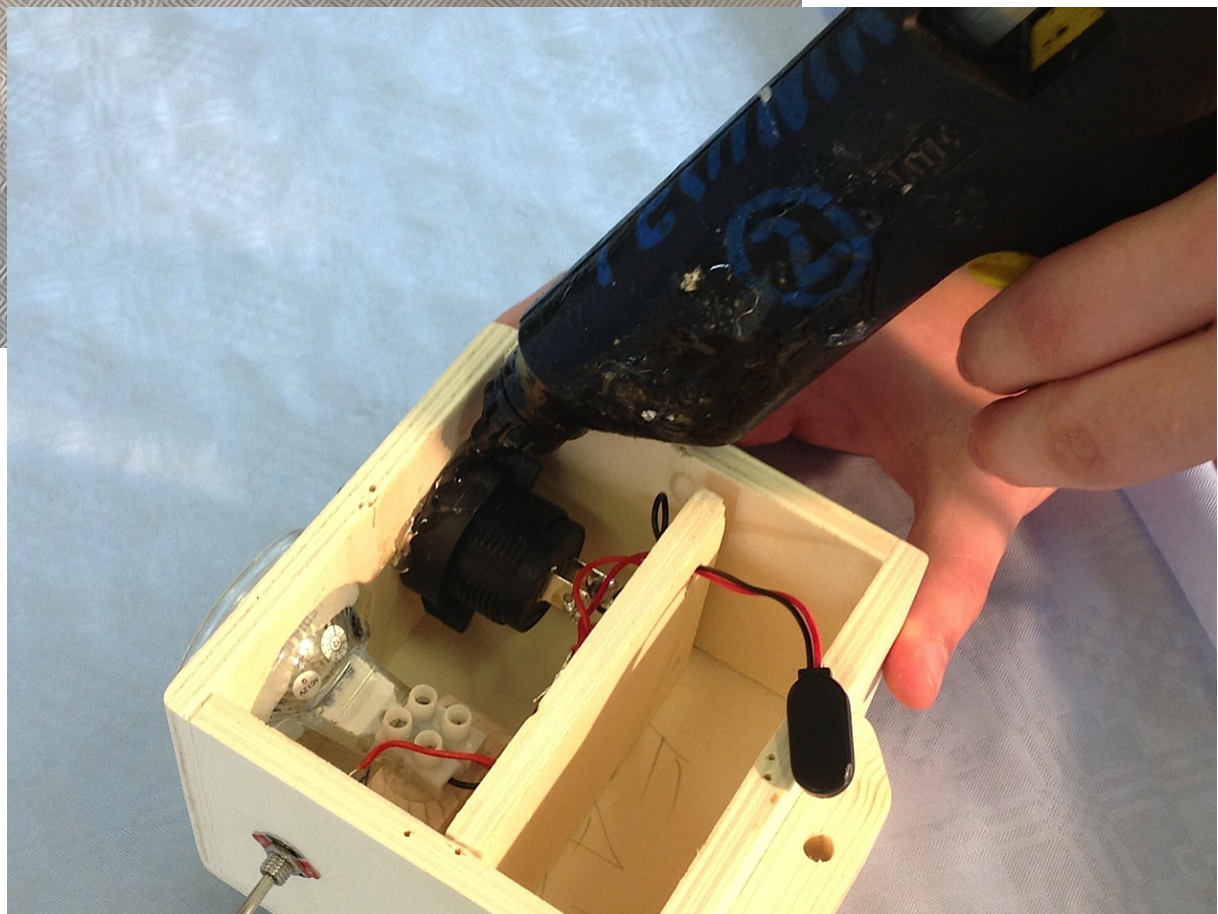




Step 6: Add the lever

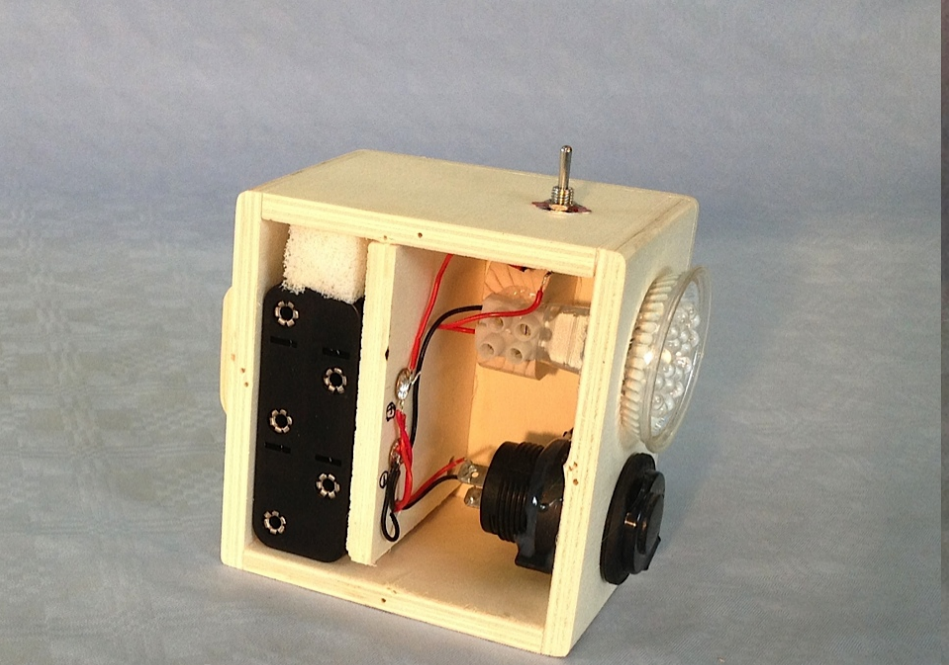


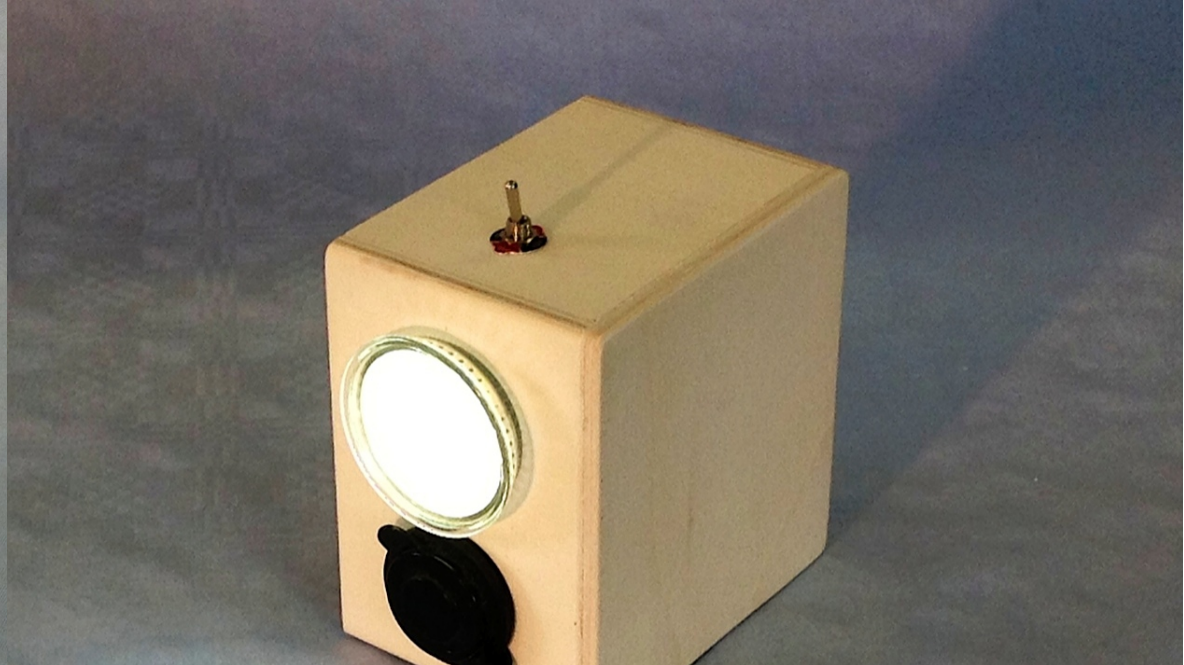
Keep in mind to connect the LED to the lever



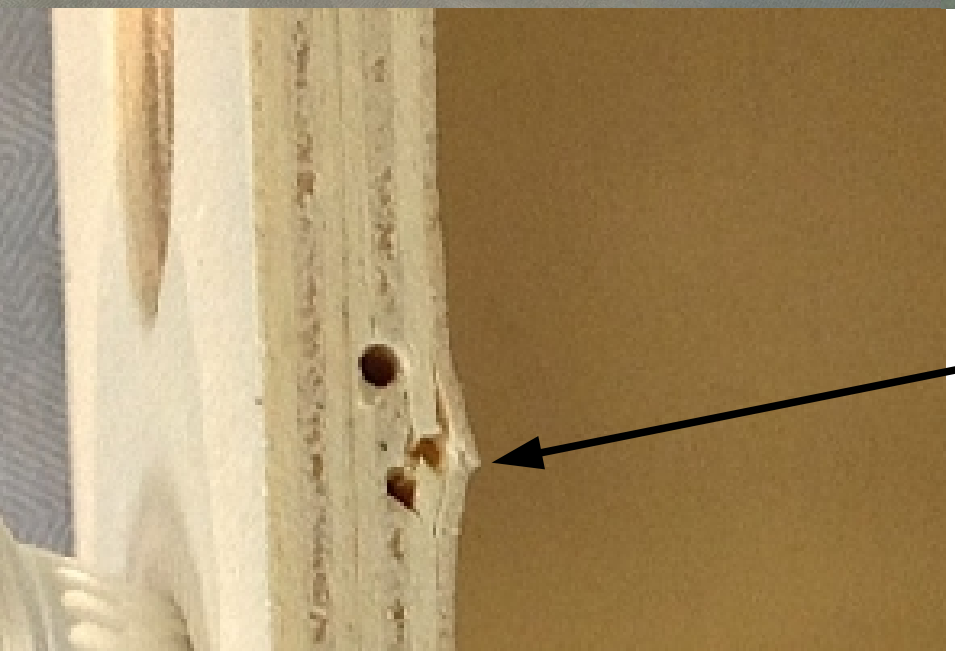
Step 7: Put in the 12V clip and fix it with glue

Step 8: Solder all cables like this.
Use the tacks you added before





Step 9: Add the battery box and close the Helplight with screws



Try to avoid this !

Step 10: Sand the case and you are done
